

August 21, 2018

Reference No. 089290

Mr. Paul D'Amato  
Regional Director  
New York State Department of Environmental Conservation  
Region 8-Division of Air Resources  
6274 Avon-Lima Road  
Avon, NY 14414

Dear Mr. D'Amato:

**Re: Surface Emission Monitoring and Ambient Monitoring Work Plan  
Weekly Report #13 (May 30, 2018 through June 5, 2018)  
High Acres Landfill**

On March 2, 2018, GHD submitted a Revised Surface Emission Monitoring and Ambient Monitoring Work Plan (Work Plan) to the New York State Department of Environmental Conservation (NYSDEC) for the Waste Management of New York LLC (WMNY), High Acres Landfill and Recycling Center located in Perinton, New York (Facility or Site). This submittal serves to provide NYSDEC with a discussion of work and monitoring activities that occurred during the weekly period of May 30, 2018 through June 5, 2018.

***Initial Equipment Installation***

On March 6, 2018, GHD commenced work activities at the Site. There were five Acrulog hydrogen sulfide (H<sub>2</sub>S) monitoring units installed at the following locations:

Station Name	Unit Serial Number	Initial Calibration Date <sup>1</sup>	Initial Operation Date
West Monitoring Station (WMS)	180200450	March 1, 2018	March 6, 2018
North Monitoring Station (NMS)	180200447	March 1, 2018	March 6, 2018
East Monitoring Station (EMS)	180200452	March 1, 2018	March 6, 2018
South Monitoring Station (SMS)	180200449	March 1, 2018	March 6, 2018
School Monitoring Station (School)	171000376	March 1, 2018	March 6, 2018

Figure 1 presents a map showing the location of each monitoring station. For the WMS, NMS, EMS and SMS, each Acrulog unit, which consists of the monitoring equipment enclosed within a weather shelter, was padlocked to a mounting bracket. Each mounting bracket was installed into the side of a tree using lag bolts. In order to assess whether tampering of the unit has occurred, a camera (Wildgame Innovations Cloak Pro Lights Out Trail Camera) was mounted on a tree approximately 20 to 25 feet away from the

<sup>1</sup> According to manufacturer, a calibration of the instrument should occur every six months. The next calibration is due by September 1, 2018.

Acrulog unit. The camera units are motion activated and will snap a 12 megapixel picture upon detection of motion (at 15 second intervals). The cameras have "night-vision" lenses which allow for pictures to be taken during night-time hours.

For the School Monitoring Station, the Acrulog unit was hung from an apparatus placed on top of the roof. The camera was placed approximately 20 feet away on an exhaust pipe penetrating through the roof.

Each of the Acrulog units was linked to a laptop via Bluetooth connection to ensure that the units were taking samples and logging readings every 10 minutes prior to departing each location. The camera units were also checked to ensure that pictures were being taken.

### *Weekly Acrulog Data Download*

On the afternoon of June 6, 2018, Mr. Bryan Szalda (GHD) visited each of the five monitoring stations. An initial inspection of the monitoring stations and the surrounding area was performed. Next, each Acrulog unit was linked to a laptop via Bluetooth connection and the monitoring data was downloaded into a separate folder for each station. After downloading the monitoring data, the connection was terminated and the Acrulog unit was checked to ensure that the equipment was continuing to log samples every 10 minutes.

Next, the pictures from the camera unit which are stored on an SD card, were downloaded onto a laptop and the SD card was placed back into the camera.

### *Summary of Collected Monitoring Data*

A preliminary review of the data provides the following:

- Between May 30, 2018 and midnight on June 5, 2018, a total of 5,029 measurements of H<sub>2</sub>S were taken.
- Of the total of 5,029 readings taken, 5,022 were below detection.
- Between May 30, 2018 and midnight on June 5, 2018, the following individual 10-minute readings were observed:
  - Two 10-minute readings of 4 ppb and 10 ppb were identified at the NMS
  - One 10-minute reading of 3 ppb was identified at the EMS
  - Four 10-minute readings of 11 ppb, 12 ppb, 10 ppb, and 3 ppb were identified at the School Monitoring Station
- No detections were identified at WMS or SMS.
- NYSDEC's ambient standard for H<sub>2</sub>S is 10 ppb for a 1-hour average (6 NYCRR Subpart 257-10). One-hour averages of H<sub>2</sub>S for all sampling periods to date are below the NYSDEC standard of 10 ppb.
- During each weekly data download, GHD checks the functionality of the Acrulog devices by introducing a calibration gas to confirm that the devices are properly operating. On May 30, 2018, Mr. Michael Casullo of GHD performed the field check on the Acrulog unit located at the School

Monitoring Station. The testing used a 1,000 ppb calibration gas which was connected to the inlet of a 10:1 dilutor. The outlet of the dilutor was then connected to the sampling port of the Acrulog unit. The resulting concentration introduced into the unit is approximately 100 ppb. The instrument was then placed into sampling mode to take a reading and verify that the unit was working properly. The four detections at the School occurred immediately following the calibration check after the unit was returned to sample logging mode. GHD believes that the calibration gas was not fully purged from the device causing the sensor to record H<sub>2</sub>S from the calibration gas that remained within the unit. In addition, the Acrulog unit reached a temperature of 124°F at 16:08 (last temperature reading logged before detections began occurring), which is outside the instrument temperature range according to Appendix C of the Work Plan. The elevated temperature is believed to have occurred due to sunlight exposure while on top of the roof of the school (where the temperature is higher than normal ambient temperature due to absorption of sunlight). GHD believes that the field calibration check together with the elevated temperature of the instrument were the cause of the detections recorded immediately following the field check, and that they are erroneous. GHD personnel identified no odors at this time and none of the instruments immediately adjacent to the landfill had detections.

- GHD spoke with the supplier of the Acrulog devices on July 9, 2018. The equipment supplier confirmed that above 104 degrees F the units begin to lose accuracy, and may not be purging the calibration gas as quickly as when the units are at a lower temperature. GHD is working to modify our procedure for the field checks to address this issue.

While seven readings of H<sub>2</sub>S were detected (0.14 percent of all readings), the hourly averages were all below applicable thresholds. In addition, it should be noted that the detection of H<sub>2</sub>S does not confirm the landfill as the source. Other sources in the vicinity commonly produce H<sub>2</sub>S including wetlands, sanitary sewers and other potential sources. The on-site meteorological data at the Site for the week of May 30, 2018 through June 5, 2018 is provided in Attachment 1.

Ambient average concentrations of H<sub>2</sub>S typically range from 0.11 to 0.33 ppb (Agency for Toxic Substances and Disease Registry (ATSDR) Toxicological Profile for Hydrogen Sulfide and Carbonyl Sulfide).

Figure 2 shows the monitoring data compared to the NYSDEC ambient standard. The raw data for each monitoring station during the period of May 30, 2018 through June 5, 2018 is provided as Attachment 2 to this report.

### ***Summary of Landfill Activities***

Operational activities occurring during the week of monitoring included the following:

- Leachate extraction
- Operations and maintenance
- Transportation, filling, compaction and cover of typical volumes of waste received by rail and truck
- Typical volumes of landfill gas extraction and combustion in flare and engine plants
- Composting

- Construction of Cell 12b
- Soil grading on the top of Cell 10 and Cell 11

Further details on the monitoring methods and evaluation of results will be provided in our final report.

We appreciate your assistance in this process. We plan to issue weekly reports going forward until the completion of work activities. Please feel free to contact us if you have any questions, if you would like any clarifications, or additional information.

Sincerely,

GHD
